```c
/*WAP to print elements of an char array and integer array
1.integer array size should not be disclosed
2.char array size must be less than the no.of elements
*/
#include<stdio.h>
int main()
{
    int i,a[]={1,2,3,4,5,6,7,8,9};  //declare and define array, declare i for referencing the array
    char ch[2]={'a','b','c','d',};      //declare and intialize the character array
    for(i=0;i<5;i++)                //define a for loop for referencing elements of an array
    printf("a[%d]=%d\n",i,a[i]); //prints the elements of inrteger array
    for(i=0;i<8;i++)                //define a for loop for referencing elements of an array
    printf("character ch[%d]=%c\n",i,ch[i]);  ////prints the elements of character array
}
```
